

ICE BAR MAKING MACHINE

As usual, it is defined by the minimum space and various capacities.

This ice is very coveted by the great length of the bar, which is properly equipped for cooling drinks at major events, conservation of fish, refrigerators, bakeries, shoveling chicken, gastronomic, etc.

Structure	Stainless steel AISI 316L. Welding with argon. Expanded polyethylene insulation.
Compressor	Semi-hermetic.
Condensing unit	By air or water. With environmentally friendly refrigerant gas 404A.
Electric board	Automated with breaker, thermal protection, phase protection, motor protection and emergency stop. With a PLC controller.
Production capacity	Of 15, 33 or 60 molds for bar of about 12kg. or 15 kg. each, with production capacity of 3 cycles every 24 hours. In 25 kg. per bar with a production capacity of 2 cycles in 24 hs. Up to 600 bars in all sizes.
